### HOSPITALITY & RECREATION

The High Ground Restaurant and Bar in Wakad is the brainchild of Nanasaheb Rachkar, who is in the construction, farming & petroleum business. High Ground is his first venture in the hospitality sector. The basic concept is to provide a fine dining experience at the customer's convenience.

Spread over a large area of 8,150 Sq.ft, the place has five different seating styles with 165 seating capacities. Each provides for customers of all ages and interests. The team at S2interiors have given different layers to the restaurant & bar. Apart from the bar and buffet & live kitchen space, the place is a venue for DJ nights.

A vegetarian & non-vegetarian cooking place has been fashioned. The in-house bakery completes the picture. Diners can also find WiFi, a smoking area, buffet display, banquet/party area and other seating options.

Find six huts that have been constructed from the fabrication of yellow pine and tabletops in Shisham wood. There are individual accents and comfortable cushions. A toughened glass pathway with desert sand & white pebbles allows customers to walk towards the huts.

The couples' segregated area has two chairs on each side.

Eight tables provide an outside view courtesy of the glass facade. The arch pattern in design given for every table gives them their privacy, along with a good view any time of the day.

There is a family seating area with a separate hut complete with swings that give families a chance to bring their kids & friends together. The rope area is where the space is provided for special moments. Six round tables have eight seating capacities each. Find the area covered in ropes partition and on the ceiling in a wave pattern. This area is one step up from ground level.

There is a cantilever or hanging seating just two steps from the ground level. The swing area is a provision with just two tables with eight seating capacities. The banquet area allows 40 people to sit at the buffet counter. Pinewood has been used in the ceiling in a geometrical style.

A partition made out of PVC pipe & pine wood is unique. For official meetings & dining experiences, a

bureaucratic seating arrangement has been created. Whether you want a formal dining or casual one, the firm has ensured the seating meets the need.

The High Ground Restaurant and Bar is a unique place designed by ID Siddharth Shah & ID Suraj Marda of S2 Interiors.
